## SOMETHING **BIG** IS COMING TO HANSEN'S MVP

• With the addition of the 2-1/2", 3" and 4" port sizes, HANSEN now offers the LARGEST and MOST COMPLETE integrated valve family.

• Featuring ACT<sup>®</sup> Anti-Corrosion Technology as standard!

• Now Evaporator Control Groups (stations) can be completely designed with MVP valves.

• 3-Positions (Stop-Control-Stop) for reduced pressure drop.

• Integrates HANSEN'S <u>INHERENTLY SAFER</u> HCK5D Two-Step Gas Powered Suction Stop Valves.

#### **MVP MULTI-VALVE PLATFORM VALVE STATION**

The MVP is a rugged, compact refrigerant control valve station offering multiple variations and functions to accommodate a wide range of capacities and application requirements. Standard features include manual opening stem, 60 mesh strainer (100 mesh strainer standard on MVP13), seal caps and 600 psig (41 bar g) pressure rating. Gauge port connections available. Interchangeable parts and parts kits with existing Hansen valves. Ships pre-tested and assembled for quick, easy two weld installation.

**To Order:** Specify MVP valve station size, configuration (1 thru 8) and connection size and style (SW/ BW/ODS). Specify control valve configuration (solenoid/pressure regulator/motorized), coil voltage and connection (leaded or DIN), pressure setting range (See Page 8) and options if required. For Pressure Regulator Variations, see page 9 for List Extra pricing. Unless specified, Solenoid will have standard coil with 18<sup>°</sup> leads and ½<sup>°</sup> fitting, 115V; Pressure Regulators will have standard pressure range and factory setting. For Gas-Powered configurations (-1 and -8) add required HS8A pilot solenoid valve (see Page 4).

Approximate weight: MVP13, 16 lbs (7 kg); MVP20-32, 35 lbs (16 kg); MVP40-50, 75 lbs (34 kg) MVP65-80, 190 lbs (86 kg); MVP100, 250 lbs (114 kg).

\*\*1-1/2" WN Flanges List Extra \$259

\* Weld-in valves supplied as separate pieces, not as welded assemblies.

HS2 † has threaded end connections instead of flanges.

Note: Valves less flanges for replacement, deduct list price of equivalent flange kit from above, see page 7. Strainer ¼" plug standard ST100, ¼" plug optional ST050D, List Extra \$33. Close-coupled HCK4 check valves also available, refer to page 14. 1%" is standard 2-bolt flange design; 4-bolt flange style available to replace 1%" R/S, HS4A-4 10% List Extra. Valves for CO<sub>2</sub>, contact factory.

#### HS4D/HS4DW TWO STEP DUAL SOLENOID VALVE

#### Flanged and Weld-in

This heavy duty, reliable two step dual solenoid design allows for closed, partially open and fully open valve positions. Reverts to closed position in the event of power failure. Includes two encapsulated solenoid coils. Available with close-coupled strainer/check valve and optional wireless pilot lights. Flange-to-flange drop in for standard HS4A.

**To Order:** Specify model, port size, connection style and size, coil connection style, voltage, and strainer, weld-in or ACT if required. Unless specified, standard coil with ½<sup>r</sup> fitting will be supplied.

#### **ENCAPSULATED SOLENOID COILS**

Watertight encapsulated solenoid coils. Available with 18''(450 mm) wire leads with  $\frac{12''}{2}$  NPSM fitting for conduit, and plug-in DIN connection socket. Wire leads are standard for 115V, 208/230V, or 24V; 50/60Hz. Weight 1 lb (0.5 kg).

To Order: Specify catalog number, voltage and connection.

Catalog No.	Voltage	Connection	List Price		
70-1085	115V	18" leads, 1/2" NPSM conduit			
70-1086	230V	18" leads, 1/2" NPSM conduit	\$124

Plug-in Coil with DIN Socket

#### BEACON PILOT LIGHTS AND ADAPTER KITS FOR SOLENOID COILS

Convenient and easy to install; no extra wiring required. Designed to sit atop all solenoid coils except normally open solenoid model. Kits include pilot light, o-ring and knob.

To Order: Specify catalog number.

Catalog No.	Description	List Price
70-1100	RED Pilot Light Kit; AC Coils Only	
70-1101	AMBER Pilot Light Kit; AC Coils Only	\$109
70-1102	GREEN Pilot Light Kit; AC Coils Only	

Beacon Pilot Light Kit

#### FLANGES & ADAPTER RINGS

Hansen flanges through  $1\frac{1}{2}$  (32 mm) port are the 2-bolt oval flange style, standard. From  $1\frac{1}{2}$  to  $4^{\prime\prime}$  (40 to 100 mm), the standard is 4-bolt square. All flanges are male tongue only. ODS solder flange construction is steel bored to accept copper tubing.

**To Order Flange Kits:** Specify flange size, and connection style and size. Example: Number 100 Flange Kit with  $\frac{4}{7}$  FPT. For a union, order Union Kit plus appropriate Flange Kit. Contains one pair of flanges (of the same size and style) without bolts, nuts or gaskets for a Hansen flanged valve.

If ordering flange gaskets in quantities of 12 or more, Deduct Extra 50%.

To Order Adapter Rings: Specify FAR (Female Adapter Rings) or MAR (Male Adapter Rings), and flange size.

To Order Union Kits: Specify model number. Contains one female adapter ring, bolts, nuts and two flange gaskets.

#### **REFRIGERANT STRAINERS (FILTERS)**

For refrigerants or oil. Close-couples to flanged valves, 60 Mesh (233 micron) stainless steel screen, ST050 has 100 Mesh (150 micron), ½" threaded pumpout plug standard ST200 & larger; ¼" plug standard ST100, ¼" plug optional ST050D

**To Order:** Specify catalog number and connections. When ordering less flanges for close-coupling, specify for close-coupling to receive correct length bolts. WN or ODS flanges available at extra cost. Weld-in connections:  $\frac{34}{7}$  thru 2' (20 to 50mm) SW inlet x BW outlet;  $2\frac{1}{2}$ '' (65 mm) SW; 3'' to 6'' (80 to 150 mm) BW. For CO<sub>2</sub> service, contact factory.

#### **Options for Strainers**

**Perforated Metal Strainer Basket:** For protection of compressors in suction side port applications 1½" to 3" (40 to 80 mm); contact factory.

**Cloth (Filter) Bags:** Available 3/4" to 4" (20 to 100 mm) for system start-up, see Page 37. Requires ST100HD heavy duty strainer basket.

#### HA4A/HA4W REFRIGERANT PRESSURE REGULATORS

#### Flanged and Weld-in

#### (For Ammonia, Halocarbons, CO<sub>2</sub>)

The complete line of modular Pressure Regulators has been designed for simple, reliable operation. These pressure regulators use a series of easily changed, screw-in control modules (pilots) to determine regulating functions. Shipped fully assembled and 100% pressure tested. CRN Registration and CSA Certification standard.

To Order: Specify model, port size, connection style and size, range, and strainer; weld-in or ACT if required.

Explosion Proof (Class I, Division II) available: HA4ADX, HA4ASX and HA4ABX (120 V STD), List Extra \$1,065. Normally open pilot solenoid (HA4ADNO, HA4ASNO, HA4ABNO), List Extra \$262

† 25% & 50% Reduced Capacity Plugs are available.

Note: Valves less flanges for replacement, deduct list price of equivalent flange kit from above, see page 7. Close-coupled HCK4 check valves also available, refer to page 14. 11/4" is standard 2-bolt flange design; 4-bolt flange style available to replace 11/4" (32 mm) R/S, H4A4-4, 10% List Extra. For CO<sub>2</sub> service, contact factory.

\*\*1-1/2" WN Flanges List Extra \$259

#### **REGULATOR PRESSURE SETTINGS**

The HA4A regulator family can control temperature, inlet, outlet, or differential pressure. Regulator variations are available that enable one regulator to perform several functions. Combinations of variations also available.

Regulators include a manual opening stem, and 1/4" FPT gauge port. Shipped fully assembled and tested.

HA4A Standard Regulator includes upstream pressure control module. Controls inlet pressure for evaporator, condenser or heat recovery control or defrost relief.

#### **CONTROL MODULES (PILOTS) FOR REGULATORS**

Control modules enable the main regulator to perform different control functions. Pilots are factory installed, or can be retrofitted. Non-rising stem can be adjusted by using a ¼" wrench. Catalog numbers are for the screw-on pilot module.

To Order: Specify control module catalog number, range, setting and coil connection style and voltage if applicable.

Control Module	Description	List Price	Weight Ibs (kg)
M3	Inlet Pressure. Specify Range. Range A: Part Number 75-1097 Range B: Part Number 75-1098 Range D: Part Number 75-1205	\$440	5 (2)
	Range C: Part Number 75-1204 Range V: Part Number 75-1099	\$687 \$703	
M3W	Inlet Pressure. Range A: Part Number 75-1126 M3W compact welded pressure pilot is standard on ¾" to 1¼" (20 to 32mm) valves.	\$440	5 (2)
	Solenoid. Part Number 70-1052 Normally Closed Facilitates on/off control of flow through control module. Requires solenoid coil, see page 8 for selection.	\$213	1 (.5)
	Part Number 70-1113 Normally Open	\$473	1 (.5)
мзо	Outlet Pressure. Specify Range. Range B: Part Number 75-1101 Range V: Part Number 75-1100	\$842	6 (3)
M3L	Differential Pressure. Range A: Part Number 75-1081	\$581	5 (2)
M3P	Pneumatically Compensated. Range A: Part Number 75-1081 Air or other pressure in bonnet raises inlet pressure setting on a 1:1 ratio.	\$581	5 (2)
мзк	Range V: Part Number 75-1249         Reseating Relief. Set and Tagged. Specify Range and Setting.         Range A: Part Number 75-1103         Range B: Part Number 75-1104         Range D: Part Number 75-1203         Standard setting (for ammonia defrost) 70 psig (4.8 bar).         Range C: Part Number 75-1202	\$846 \$525 \$776	5 (2)
M3KW	Reseating Relief. Range A: Part Number 75-1127 Compact welded pressure pilot is standard on valves sizes ¾" to 1¼" (20 to 32 mm). Standard setting (for ammonia defrost) 70 psig (4.8 bar).	\$525	5 (2)
M3E25	External Connection. Part Number 35-1015 Enables a remote pressure source to be introduced to the regulator via a pilot line (replaces a pilot). ¼" FPT with separate 4" (100 mm) long weld nipple.	\$170	1 (.5)
M3S	Stopping Plugs. Part Number 75-1063 To be used in regulator's pilot valve port when port is not utilized. Stopping plugs have square head and are marked with "0".	\$40	.5 (.2)
M3B	Straight Through Plugs. Part Number 75-1064 To be used in regulator's pilot valve port when port is not utilized. Straight through flow plugs have a hex head and are marked with "1".	\$40	.5 (.2)
МЗМ	Electric Motor. Specify Range. (Module Only) Range A: Part Number 75-1193 Range B: Part Number 75-1283	\$515	5 (2)
	Range V: Part Number 75-1285	\$780	

#### **MODULAR REGULATOR BODIES**

Modular regulator bodies less pilots and less flanges. Model AR1 (one pilot port) and Model AR3 (three pilot ports). Includes flange gaskets, bolts and nuts, and a plugged ¼″ outlet pressure access port for connecting outlet or differential control module sensing lines or gauges.

**To Order:** Specify model number and port size.

\*\* See page 9 for motor and controller options.

#### HCK2/HCK2W GAS-POWERED SUCTION STOP VALVES

#### **Flanged and Weld-in**

Heavy duty, flanged and weld-in, gas-powered suction stop valves. Gas power to close, internal bleed to open. Rugged ductile iron body.  $\frac{1}{2}$  SW (FPT on request) flange union with internal disc strainer included. 5" and 6" (125 and 150 mm) are integral butt weld end only.

To Order: Specify model, port size, pilot solenoid and strainer if applicable, voltage and connection size and style.

## Simple - Safe - Reliable

### HCK5D/HCK5DW GAS-POWERED TWO STEP SUCTION STOP VALVES

#### Flanged and Weld-in

Heavy duty, flanged or weld-in, gas-powered two step suction stop valves. Self-equalizing with a delayed opening feature after defrost or power failure. Internal, controlled bleed down piston design.  $\frac{1}{2}$  SW (FPT on request) flange union with internal disc strainer included.

To Order: Specify model, port size, voltage and connection size and style.

#### **HCK4 IN-LINE CHECK VALVES**

#### Flanged

Compact, flanged, in-line (non-return) check valves open wide for flow in arrow direction on body, valves close when pressure reversals occur. Seat discs and springs are stainless steel.

#### **HCK4LR Gravity Drain Low Pressure Drop**

The HCK4LR series of in-line gravity drain check valves are dependable, compact and rugged. The HCK4LR gravity drain check valves feature a low wide-opening pressure differential suitable for liquid transfer systems and other low pressure drop applications. Available in 2", 3" and 4" (50, 80, and 100 mm); add suffix "LR" to model.

Kits available with spacer for direct replacement of Wolf-Linde/H.A. Phillips:

#### 3" (80 mm) Replacement Kit, Part No. 72-1001, List \$1,234

#### 4" (100 mm) Replacement Kit, Part No. 72-1002, List \$1,926

To Order: Specify model, flange connection style and size. For CO<sub>2</sub> service, contact factory; UL Listed.

† Adapter ring MAR needed for close-coupling to valves. Special loaded check valves for defrost condensate float drain applications are available, specify model HCK4-2-10, HCK4-2-18 or HCK4-2-30 (used with liquid drainer HD101, see page 27).

\* 1¼" is standard 2-bolt flange design; HCK4-6 4-bolt flange style available to replace 1¼" R/S, contact factory.

#### HCK1/HCK1W PISTON TYPE CHECK VALVES

#### Flanged and Weld-in

Heavy duty, piston type check valves control the flow of refrigerant, and compressor discharge. Valves open wide for flow in arrow direction on valve body and close when flow reversals occur.

The HCK1 is suitable for compressor or pump discharge, hot gas lines and pulsating pressure applications. Contact factory for Screw Compressor Side Port Applications. Suitable for Ammonia, R-22, R-134a, and other approved refrigerants.

To Order: Specify model, flange connection style and size.

#### **COMBINATION STOP/CHECK VALVES**

#### **Socket Weld and Butt Weld**

Durable, carbon-steel-bodied valves are a combination stop valve and normally-spring-closed check valve. Valves open wide for full flow in the arrow direction on the valve body and promptly reseat when reverse flow occurs. Stainless steel valve stems facilitate positive manual closing while Teflon disc seats assure reliable, long-life seating. Use of these combination valves reduces pressure drop, minimizes space requirements, and simplifies installation. Angle body is standard. Straight through bodied valves available on special order; contact factory. Handwheels also available.

To Order: Specify catalog number. Check valve capacity prior to ordering, line sizing is not recommended.

Liquid Drain Ball Valve

#### **SHUT-OFF VALVES**

#### (For Ammonia, Halocarbons, CO<sub>2</sub>)

Rugged shut-off valves are a strong, reliable component for modern industrial refrigeration applications and suitable for liquid, suction, hot gas, discharge, recirculating liquid or oil lines.

Screwed Bonnet Threaded Valves feature non-leak stainless steel stems, and ductile iron bodies. Threaded, Socket Weld and Butt Weld Bolted Bonnet Valves feature large bonnet bolts for exceptional strength, non-leak stainless steel stems, and forged steel or low temperature cast steel bodies.

**To Order:** Specify model. For  $CO_2$  service, contact factory for pricing. CE Mark for  $1\frac{14^{"}}{32}$  mm) and larger; **10% List Extra**. 5/8" thru 4-1/8" ODS angle valves available, **20% List Extra**.

\*Note: 1" and 1-1/4" Threaded/Screwed Bonnet Valves were obsoleted in June 2013.

#### Valves and Controls

#### HAND EXPANSION VALVES

#### (For Ammonia, Halocarbons, CO<sub>2</sub>)

Precision-calibrated, adjustable, slotted plug flow regulating Hand Expansion Valves are ideal for metering or flashing expansion of liquid refrigerants. Featuring slotted plugs for linear flow regulation along with Teflon seat discs for tight closing. Slotted plugs increase accuracy and are more tolerant of dirt particles than metal-seated tapered-plug expansion valves.

Valve stems are stainless steel and have double seals to eliminate stem leakage. The patented non-leak seal plus packing design permits low torque operation for valve adjustments since the packing nut requires little tightening. Bar handle or yellow seal caps distinguish these regulators from shut-off valves.

**To Order:** Specify model. For  $CO_2$  service, contact factory for pricing. CE Mark for  $1\frac{1}{4}$  (32 mm) and larger, **10% List Extra**. 5/8 thru 4-1/8 ODS angle valves available, **20% List Extra**.

\*Note: 1" and 1-1/4" Threaded/Screwed Bonnet Valves were obsoleted in June 2013.

#### SHUT-OFF AND HAND EXPANSION VALVES: EXTENDED NECK

Extended Neck Shut-off and Hand Expansion Valves are available with bolted bonnet design, 316 stainless steel stem and packing nut. Extended Neck valves meet or exceed the insulation thickness recommended in IIAR Piping Handbook. Contact factory for pricing.

#### PRESSURE RELIEF VALVES

Designed to provide emergency relief from excessive pressure in refrigerant containing vessels. Built in strict conformance with ASME Boiler and Pressure Vessel Code requirements for safety relief devices. Each valve bears the ASME code symbol of certification (UV). Capacities are rated by the National Board of Boiler and Pressure Vessel Inspectors. All pressure relief valves feature an installation date tag.

#### **Reduced Capacity**

Reduced capacity pressure relief valves meet discharge line sizing requirements; pressure drop through the Hansen three-way dual manifold valve is less than 3% of the pressure setting. Green date tag indicates reduced capacity valve. Add "R" suffix to model number.

To Order: Specify model number, inlet/outlet connection size and pressure setting. For reduced capacity, dual or dual union options, add appropriate suffix to model number. For CO, service, contact factory.

Setting Certi	ficate, access to electronic	version of setting certi	ficate now included; see Han	tech.com.

+Dual Pressure Relief Valve Kit includes two pressure relief valves, a three-way dual shut-off valve, and two nipples. unassembled. Add "D" suffix to model number.

Standard pressure settings: 150\*,175, 200, 225, 250\*, 275, 300\*, 325, 350 psig. 400 psig (27.6 bar g) available for all models except H5601 and H5602. (\*Stock pressure settings.) Custom pressure settings in psig, bar, or kPa are available upon request. Minimum pressure setting is 150 psig. For halocarbon systems, rupture disc assemblies are required; see below.

#### **THREE-WAY DUAL SHUT-OFF VALVES**

For parallel installation of pressure relief valves in accordance with ANSI/ASHRAE 15-2007 Safety Code for Mechanical Refrigeration (pressure vessels having 10 cubic feet or more of internal gross volume, shall be fitted with dual pressure relief valves). Considered the only acceptable type of shut-off valve for use with refrigerant relief piping because one valve remains operational, while the other is being replaced; thereby eliminating the need to remove refrigerant from the vessel. UPDATED NOTE: 600 PSIG SWP

H8021

\* Standard Inlet and outlet connections are threaded female NPT all the same size. Add "S" suffix (socket weld) or "W" suffix (butt weld) to model number, ie H8021S, H8022W

#### RUPTURE DISC ASSEMBLY

Relief device used in series with a pressure relief valve. Two 1/8" FPT side ports are provided for installation of a pressure gauge or switch to indicate a discharge. For halocarbon systems, rupture disc assemblies are required; see below.

To Order: Specify model number, pressure setting (150, 250, 300, 350 or 400\* psi), and optional pressure gauge or pressure switch. \*400 psi available for RDA1 and RDA2 only.

1/8" MPT Pressure Gauge, HG25: List Price \$142. 1/8" MPT Pressure Switch, HPS: List Price \$576.

Stamped capacity of relief valve when installed with rupture disc device between the inlet of the valve and the vessel shall be multiplied by a factor 0.90 of the rated relieving capacity of the relief valve alone.

Self-Alarming Relief Valves!

Detects when relief valve lifts. Provides bright LED indication. Includes ACT Coating.

NEW !!! Optional Version of POP for Computer Interface or Remote Notification will be Available Late Spring 2022

Three Way Dual Relief Valve with Rupture Disc Assembly and Pressure Gauges

#### EZ-SRV™ CARTRIDGE RELIEF VALVES

Designed to provide emergency relief from excessive pressure in refrigerant containing vessels. These valves are built in strict conformance with both ASME Boiler and Pressure Vessel Code requirements and ISO 4126 – Safety Devices for Protection of Excessive Pressure. Each valve bears the ASME code symbol of certification (UV), and features an installation date tag. Valve capacities are rated by the National Board of Boiler and Pressure Vessel Inspectors (NB).

EZ-SRV<sup>™</sup> cartridge valves offer the same reduced capacities as Hansen H5600 "R" series relief valves. The revolutionary cartridge design allows for quick, easy replacement with no need to disconnect from the relief piping. The EZ-Fitting is available with welded or threaded end connections. EZ-Fittings have a built-in ¼″NPT gauge port connection to facilitate safer and controlled servicing. A ¼″MPTxFPT gauge valve such as the H7771 can be installed in gauge port to facilitate servicing. The optional HG27 compact gauge has two pressure needles. The black needle shows current pressure and the red tell-tale needle shows highest pressure seen by gauge.

#### **Retrofitting Existing Valves**

The Hansen EZ-Adapter component simplifies retrofitting of existing Hansen relief valves. The EZ-Adapter provides the same centerline dimensions as the H5600 series relief valve installed with a 2<sup>r</sup> long nipple, thereby minimizing piping changes to discharge line connections.

#### **OPTIONAL ACCESSORIES**

HG27 Gauge, 2" Face, Tell-tale needle 0-600 psi. 1/4" MPT; List \$200 H7771 Angle Gauge Valve, 1/4" MPTxFPT; List \$110

Setting Certificate, access to electronic version

of setting certificate now included; see Hantech.com

<sup>†</sup> Currently available as threaded connection only. Includes a three-way dual shut-off valve, two EZ-SRV and two EZ-Fittings.

\*Standard pressure settings are: 150\*, 175, 200, 225, 250\*, 275, 300\*, 325, 350, 400, 450, 500, 550, and 600 psig (41 bar g). Except for EZE & EZF (400 psig/28 bar g max). (\*Stock pressure settings.) Custom pressure settings are available; can be set bar or kpa, contact factory. May require extra delivery time.

To Order: Specify catalog number, pressure setting, optional H7771 Gauge Valve and HG27 Pressure Gauge. For halocarbon applications, a rupture disc assembly is required, see page 18.

To Order Dual Kits: Add "D" suffix for Dual Kit to EZ-SRV™ pressure-relief valve catalog number. Specify inlet/outlet connection size and pressure setting.

Example: Dual Kit: EZB-BT1D, set at 250 psig.

#### **REFRIGERANT LIQUID RELIEF VALVES**

Hansen offers the EZLQ liquid relief valve, rated U.S. GPM. Typical applications include ASME vessels, oil coolers and other components that can be isolated by control valves or manual shut-off valves.

	G NUMBER EZ-FITTING)	CONNEC	TION SIZE	LIST PRICE	CAPACITY**	REPLACEMEN CARTRIDGE V

To Order: Specify catalog number and pressure setting: 50, 75, or 100 psid (3.5, 5.0, or 7.0 bar g).

#### **GAUGE, PURGE & TRANSDUCER VALVES** Threaded

These specially designed refrigerant gauge, purge and transducer valves feature tough, forged steel bodies, compact size, and polished stainless steel stems. The patented o-ring plus packing dual seal design and polished stainless steel stem virtually eliminates stem seal leakage. Safety stems are designed to be non-removable from the body to avoid dangerous stem "blow out".

Gauge valves are available with seal caps, bar handles or bare stems. Often used to isolate pressure gauges on regulators and safety relief valves. These valves may also be used for pumpout and purging of refrigerant liquid or gas. The transducer valve makes it easy to calibrate or replace the device without pumping down the system.

To Order: Specify catalog number. If ordering 100 or more of any one model, Deduct Extra 10%. Weight 0.6 lb (0.3 kg).

## Now standard with ACT!

† Long Neck<sup>®</sup> valves provide additional length for insulation and pressure gauge turning clearance.
\* HGV1 and H7771, available as welded versions, HGV1W and H7771W. Delivered with butt weld inlet connection; same list price as standard version.

#### **REFRIGERANT FLOAT SWITCHES**

Steel tank assembly with combination 3/" FPT/1" butt weld connections. Standard 2" (50 mm) differential prevents most short cycling due to momentary changes in liquid level; other differentials down to 1/2" (13 mm) are available from stock. Optional switch housing heater is available for preventing moisture penetration in humid environments. CSA certification on HLL and HLLS for Canada. Switch assembly is NEMA4X.

To Order: Specify model number. Standard connection 1/2" fitting with three 18" (450 mm) wire leads. Add "E" suffix for switch with 4 wire, grounded DIN plug connector, Example: HLLE. For CO, service, consult factory.

Model	Description	List Price	Weight Ibs (kg)

HTR2*	10 Watt 230V Heater for All HLL	\$345	1	(0.5)	

\* To order float switch with heater, add HTR1 or HTR2, example: HLL/HTR1, 115v.

#### SEE-LEVEL™ LIQUID INDICATORS

Liquid indicators for simple indication of true liquid levels in industrial and commercial refrigeration systems. Prestressed glass lens fused in steel retainer ring. Optional frost shield for clear viewing in frost conditions. Suitable for Ammonia, R-22, R-134a, CO, and other approved refrigerants. Housings meet requirements of ASME and PED for direct welding to vessels, receivers, level columns or liquid lines. Each unit marked for material traceability by lot code; certifications available on request. Large diameter Fused Metal reflex lens for easy viewing; clear lens also available. Frost shield length is suitable for temperatures down to -60°F (-51°C). Standard housing can be welded (fillet weld) into a 1.94"/2" diameter opening or 11/2" socket weld fitting, or butt welded to a 11/2" pipe (Schedule 80). The scarfed (saddle milled) housing is available for simplified welding over a 1.5" (38 mm) hole, onto 21/2", 3", or 4" pipe, such as for level columns or liquid lines. Zinc plating standard.

To Order: Specify model number, and whether material certificate is required. 600 psi (41 bar g) standard rating.

#### VARI-LEVEL ADJUSTABLE LEVEL CONTROLS FOR REFRIGERANTS

The Vari-Level® consists of a level probe for a 3<sup>°</sup> or 4<sup>°</sup> pipe level column, a control unit for ON-OFF of up to five relay operated level control points: typically, a high alarm/cutout, operating level, and low alarm/cutout (3 points). For Ammonia, R-22, R-134a and other compatible refrigerants. CSA/US Certified and CE Mark standard.

#### **Control Unit**

Bright digital LED displays percent level in vessel. Each level control point is adjustable for height and operating differential with a built-in level simulator. Standard electrical input is 115V, 50/60Hz; 230V, 50/60Hz available. Options: 4-20 mA output module, MOD420, available for computer interface or remote digital readout. Mounts inside control unit.

#### Probes

Probe connection <sup>3</sup>/<sub>4</sub><sup>"</sup> MPT. Probes available in standard lengths. Custom lengths made to order. Probe length cannot be shortened in field. 50 feet (15 m) of cable included. Longer cable lengths available, **List Extra \$70** per each additional 50 feet (15 m). For low temperature applications below -60°F (-51°C), a 5<sup>"</sup> (125 mm) extended stainless steel neck is available: **List Extra \$525.** 

#### Level Columns

Level Columns are 3<sup>°</sup> Schedule 40 pipe. Columns include one level sight glass for re-calibration plus high level float switch connections. Top probe connection on column is a  $\frac{3}{7}$  FPT; connections to vessel are combination 1<sup>°</sup> FPT / 1 $\frac{1}{7}$  butt weld. Top or bottom  $\frac{3}{7}$  FPT level column cap for field level column fabrication using 3<sup>°</sup> standard pipe: **Part No. 77-1053**, List **\$99**.

**To Order:** Specify model number, refrigerant, active probe length, and voltage. Custom level probe and level column lengths available in 1" increments; nonreturnable. **Add \$313 List Extra** to next longer length probe or column.

Note: Use Technical Equipment Discount Schedule.

†Weight includes probes and level columns packed in crates. (Shipping Weight).

#### **TECHNI-LEVEL™ TRANSDUCER PROBES**

Level transducer probes with 4-20 mA isolated output for refrigerant level control in computer operated plants. Electronics are located on top of probe. 50 feet (15 m) of two wire cable is included. Level column connection on probe is  $34^{\prime\prime}$  MPT. For Ammonia, R-22, R-134a and other approved refrigerants. CSA/US Certified.

#### Options

Built-in LCD digital readout. Add suffix "DR" to model, List \$673

Optional remote digital readout (RDR), List \$895.

Optional 115 VAC/230 VAC:24 VDC power supply unit (PSU), List \$507.

**To Order:** Specify model number, refrigerant, active probe length, and application. For CO<sub>2</sub> service, contact factory (40<sup>°</sup> to 120<sup>°</sup> only). Level Columns may be ordered for use with this product (for probe lengths up to 120<sup>°</sup> only), see Vari-Level<sup>®</sup> above. For low temperature applications below -60°F (-51°C), a 5<sup>°</sup> (125 mm) extended stainless steel neck is available, **List Extra \$525.** Explosion proof available **Add List \$1,945** 

Note: Use Technical Equipment Discount Schedule.

VLT with Digital Readout

#### **RECEIVER LEVEL TRANSDUCER PROBES**

#### (For Halocarbon Systems, especially Supermarkets)

Designed to be inserted directly into refrigerant receivers and facilitate the continuous measurement of refrigerant liquid levels. The following results can be tracked: refrigerant loss detection, refrigerant inventory measurements, warnings of excessive refrigerant levels, and insufficient refrigerant quantity.

Factory pre-calibrated and tested with no moving parts to break, jam, or fail.

Horizontal Receiver Probes (SHP) can also be used in short [less than 30" (762 mm) insertion] vertical receivers. For vertical receivers 12" to 20" (305 to 508 mm) diameter (other diameters need special engineering). Maximum insertion length is 69" (1752 mm).

Output signal 0-5V, 0-10V, or 1-6V.

Optional, 3-wire 4-20 mA output available, Model SHA or SVA, List Extra \$313.

To Order: Specify model number; insertion length; refrigerant; and receiver diameter. Standard connection (3/" NPT) or Rotalock connection (1¼"-12") available. Custom probe lengths available; nonreturnable.

Add \$313 List Extra to next longer length. For applications where refrigerant liquid temperature is below 32°F (0°C), use Techni-Level™ or Vari-Level level probes. Heavy-Duty construction is available for liquid temperatures below 50°F to 32°F, Model SSHP or SSVP, List Extra \$360

Note: Use Technical Equipment Discount Schedule.

#### SINGLE POINT LEVEL CONTROLS

Designed to detect the presence of liquid refrigerant at a specific location in receivers/vessels, intercoolers, control pressure receivers, packaged chillers, compressor packages, pump packages, surge drums, and flooded evaporators.

May be used in place of float switches, for high and low level alarms in conjunction with plant computers, PLCs, or shut-off solenoid valves.

The relay output from the SPS level switch is suitable for direct connection to solenoids, alarms, and computers. No moving parts; plug-in electronics. Unaffected by normal splash or oil coating. Watertight NEMA 3R sensor housing. Sensor connection 1/2" MPT.

To Order: Specify model number and refrigerant. Standard connection is 1/2" MPT.

Adapter for use with Hansen See-Level™ and Phillips Level Eye®: Part No. 77-1009, List \$167

Adapter for use with Henry Type LI liquid indicators: Part No. 77-1010, List \$167

**Technical Equipment** 

#### FROST MASTER® DEFROST CONTROLLERS

Frost Master® defrost controllers (timers) operate various control valves and fan relays to efficiently remove frost and ice accumulation from evaporator surfaces. There are four easy-to-set defrost steps: PUMPOUT, HOT GAS, EQUALIZE, and FAN DELAY. Defrost time and step duration are always visible. 1/2" (6.4 mm) spade terminals for optional sensor defrost initiation and termination are provided. Available with 24-Hour or 7-Day Scheduling. SPDT relays, 10 amp switch rating with battery backup and NEMA 4 enclosure (watertight). CSA/NRTL Certified. Weight 4 lbs (1.8 kg).

To Order: Specify model number. The Frost Master® may be ordered less enclosure and with necessary metal mounting plate for panel installation, add "L" suffix to model number. CE Mark not available.

Note: Use Technical Equipment Discount Schedule.

#### FROST MASTER® PLUS

The Frost Master® Plus includes an additional fifth defrost step, SOFT GAS, for individually timed opening of small soft (hot) gas solenoid valve prior to primary, hot gas solenoid valve for evaporator defrosting. Features built-in, adjustable temperature terminate with clamp-on defrosted sensor.

To Order: Specify model number. CE mark not available.

Note: Use Technical Equipment Discount Schedule

Note: In 2011, Grasslin timeclocks ("B" suffix) became standard; previously, Diehl timeclocks ("A" suffix) were used.

TS2 Temperature Sensor, List \$ 97

#### **HIGH SIDE FLOATS (FLOAT DRAIN REGULATORS)**

Ideal for metering high-pressure refrigerant liquid to a lower-pressure vessel without allowing refrigerant gas to pass. Self-contained, requires no pilot valve-to-main valve piping. For individual condenser drain to a single evaporator or to a controlled pressure receiver, condensate removal from heat recovery coil, liquid drain from hot gas defrost main, or defrosting evaporator liquid draining. Each valve is supplied with combination 1" weld / 3/" FPT. Vent/purge and oil drain connections for optional use (1/2" FPT for HT100 size).

To Order: Specify model number, refrigerant, inlet temperature and pressure, outlet temperature and pressure, and flow rate in tons or lbs/minute (kW or kg/s). For other operating conditions and refrigerants, contact factory.

Note: Use Technical Equipment Discount Schedule.

Pulse width modulating liquid refrigerant expansion valve, with a specially designed high cycle, long life solenoid operator. Controller uses a 4-20mA input signal to monitor the liquid flow to the system. The PXVW60 body has an integral 100 mesh (150 micron) strainer screen and direct weld assembly. PXV5 and PXV15 are flange-to-flange drop-in for Sporlan type D thermostatic expansion valve.

To Order: Specify model, connection style and size, coil connection style and voltage. Unless specified, standard coil with 1/2" fitting will be supplied. Contact factory for other refrigerants and capacities.

Flanges available: 1/2" NPT Flange, Part No. 30-0164, List \$48; 1/2" SW Flange, Part No. 20-1520, List \$44.

#### AUTO-PURGER<sup>®</sup> NONCONDENSIBLE GAS PURGER

#### (For Ammonia Only)

Reduce condensing pressure and lower power costs by removing noncondensible gases such as air in a refrigeration system. The AUTO-PURGER® AP08 allows up to eight locations to be individually purged, AP16 allows up to 16 points, AP24 allows up to 24 points. One AUTO-PURGER® is typically sufficient for a 1500 ton (5275 kW) system [or a 750 ton (2638 kW) system operating below 0 psig (0 bar g)]; same capacity for all refrigerants. Isolation shut-off valve kits with strainers included. Automatic water bubbler flush system eliminates water bottle attention. Water conditioning cartridge is available for hard water supply. Standard electrical supply is 115V/60Hz; 230V/60Hz, 220V/50Hz and 110V/50Hz are available. Canadian CSA certification.

To Order: Specify model number, refrigerant, and voltage. Note: Use Technical Equipment Discount Schedule.

#### NON-ELECTRIC MINI AUTO-PURGER<sup>®</sup> NEAP

#### (For Ammonia & Halocarbons)

The Non-Electric Mini AUTO-PURGER<sup>®</sup> (NEAP) is a simplified version of our well known purgers for packaged units or small plants featuring easy start-up and automatic operation. Suitable for Class I, Division II (Explosion Proof) applications with welded piping construction. One NEAP Purger suitable for smaller ammonia and halocarbon systems to 100 tons (350 kW).

#### Isolation Valve Package VPM

Optional isolation valve package (VPM) consists of three flanged welded assemblies which include the necessary shut-off valves and gauge valves for the "Foul Gas" line, Suction line and Liquid line. VPMF for halocarbons also includes filter dryers and moisture indicating sight glasses.

To Order: Specify model number and refrigerant. Note: Use Technical Equipment Discount Schedule.

#### **AUTO-PURGER® APM**

#### (For Ammonia & Halocarbons)

The AUTO-PURGER® M (APM) can purge up to a maximum of four points which makes it ideal for smaller refrigeration plants. Typically, this purger will handle up to a 200 ton (700 kW) ammonia or halocarbon system. It features welded piping construction and comes pre-assembled, pre-wired, tested, insulated, and includes an automatic water bubbler flush system. Standard voltage is 115V 50/60Hz; 230V 50/60Hz is available. CSA and CE mark available.

#### **Isolation Valve Package VPM**

Optional isolation valve package (VPM) consists of three flanged welded assemblies which include the necessary shut-off valves and gauge valves for the "Foul Gas" line, Suction line and Liquid line. VPMF for halocarbons also includes filter dryers and moisture indicating sight glasses.

To Order: Specify model number, voltage, and refrigerant.

#### AUTO-PURGER<sup>®</sup> PLUS GAS (AIR) & WATER PURGER

#### (For Ammonia Only)

AUTO-PURGER® PLUS is a totally automatic, electronically controlled non-condensible gas (air) and water purger for reducing the energy costs of operating an ammonia refrigeration system. Shipped preassembled, prewired, insulated, and includes an automatic water bubbler, a relief valve, and an isolation service valve package. One AUTO-PURGER® is typically sufficient for a 1500 ton (5275 kW) system [or a 750 ton (2638 kW) system operating below 0 psig (0 bar g). All models are suitable for ammonia only. Standard electrical supply is single phase, 20A, 115V, 50/60 Hz; 10A, 230V, 50/60 Hz is available. Canadian CSA certification.

AUTO-PURGER® PLUS Technology Package, (now Standard), includes 6" (150mm) color touch screen display, with ethernet connection, alarm history log, with multi-lingual operating instructions. Features built-in troubleshooting guide.

AUTO-PURGER® Plus with Technology Package, 8 Points.

#### **MCV MOTORIZED CONTROL VALVES**

The All NEW, Hansen MCV is a highly reliable and rugged, direct operated Motorized Control Valve. It features the highest rated MOPD and SWP. Valve position is displayed on a forward facing, bright LED readout.

Whether controlling flow, level, temperature or pressure, the MCV Motorized Control Valve provides precise control. A wide variety of control signal options allows the customer flexibility to control the valve by utilizing their own PLC or computer.

- Plug and Play logic for quick and hassle-free installation
- Self Calibrating Automatic calibration on power up
- One high-torque motor fits all 3/4" 4" (20 to 100mm)
- MOPD and Safe Working Pressure (SWP): 800 psig weld-in line or 400 psig flanged
- Various Input Control Signal Choices: 0-20 mA, 4-20 mA, 0-5 V, 0-10 V, 1-6 V, and dry contact
- Power Input: 24V AC or DC, Loss of Power back-up available
- Front facing, bright LED Readout of valve position and 4-20mA feedback output signal
- Fine motor control: 200 steps per revolution

MCV

#### Now Available on MVP13 - MVP100 Multi-Valve Platform, see pages 2 & 3

#### POWERHEAD CONVERSION KITS (SMV to MCV)

Part Number	Description	List Price
75-1363	7/32" MCXV/A Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, oring, gasket, grease, dongle	\$3,004
75-1364	9/32" MCXV/B Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, oring, gasket, grease, dongle	\$3,004
75-1362	1/16" MCXV/c Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, oring, gasket, grease, dongle	\$3,004
75-1318	3/4 to 1-1/4" Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, oring, gasket, grease, dongle	\$3,004
75-1319	1-1/2" to 2" Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, o- ring, gasket, grease, dongle	\$3,755
75-1347	3" Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, oring, gasket, grease, dongle (New V-port required)	\$3,933
75-1348	4" Conversion Kit: Motor Actuator, bonnet, bolts, cartridge, oring, gasket, grease, dongle (New V-port required)	\$4,647

Kit Includes all parts necessary to field-convert an existing HMXV, HMMR/V, HMSV to the new style MCV/R. However, a MCT tool is required and a new V-Port Kit may also be required. For Power-Close HMXVC, HMMRC/HMMVC models, a HUPS will be required; see page 28.

Note: USE PARTS DISCOUNT SCHEDULE

#### VALVE CONTROLLERS FOR MOTORIZED CONTROL VALVES

Hansen stand-alone controllers are suitable for applications where computer control is either not desired or not available. Controllers require 24V AC or DC power. A separate, external 24 VDC power supply (such as PSU) may be required to power level or pressure transducers.

To Order: Specify model number. For DX Controllers and Sensors See page 25

Note: Use Technical Equipment Discount

	CONTROLLERS									
PXVC-PT	Superheat/Supercooling Controller (includes TS2 temp sensor; requires PT2 pressure transducer, not included see below)									
PXVC-DX	DX Controller (HPT not included, see below)	\$429								
PXVC-T	Temperature Controller (includes TS1 temp sensor)	\$469								
PXVC-L	Level Controller (level sensor not included)									
PXVC-P	<b>XVC-P</b> Pressure Controller (transducer not included, see PT3 below)									
	SENSORS									
PT2	Pressure Transducer, 15" - 85 psig, 4-20mA, 1/4" MPT	\$527								
PT3	Pressure Transducer, 15" - 285 psig, 4-20mA (for PXVC-P)	\$940								
IMW	Immersion Well for above, SS, 4" insert, 1/2" MPT	\$45								
	ACCESSORIES									
WTE3	Water tight Enclosure (NEMA4), for above controllers	\$214								
PSU2	Compact Power Supply (100-240VAC: 24VDC) for above enclosure	\$292								
RDR	Optional remote digital readout	\$895								

PXVC

#### HPT PRESSURE/TEMPERATURE TRANSDUCER

The HPT Pressure/Temperature Transducer is designed to measure both temperature and pressure within a single connection. Electronics calculate superheat or subcooling for the specified refrigerant with a 4-20 mA Output.

	Catalog	Number	
Refrigerant	-35°F to +150°F		List Price
For Ammonia	(-37°C to +65°C) HPT717	(-51°C to +65°C) HPTL717	\$1,481
			φ1,401
For R-22	HPT22	HPTL22	
For R-134a	HPT134	HPTL134

For R-507A	HPT507	HPTL507	
For Propane	HPT290	HPTL290	

Standard model is suitable for ammonia. Also suitable for halocarbons, propane, and carbon dioxide with the appropriate refrigerant key. Standard model HPT is suitable for -35°F to +150°F (-37°C to +65°C).

Low temperature model HPTL is suitable for -60°F to +150°F (-51°C to +65°C). Low temperature models have a longer insertion length. To Order: Specify model number and refrigerant. Note: Use Technical Equipment Discount Schedule.

HPT

#### **GAS DETECTION SENSORS**

Sensor technologies available for Ammonia, Halocarbon, CO<sub>2</sub> and other Hansen approved gases.

To Order: Specify model, range and refrigerant. Shipping weight: 2 lbs (.91 kg).

Note: Use Technical Equipment Discount Schedule

#### hansen pumps

Suitable for liquid transfer, liquid pressure boost, recirculating (overfeed) liquid ammonia, R22, R134a and other approved refrigerants. No rotary shaft seals to leak. No lubricating oil, oil heater, or grease needed. Stock models listed; other sizes and stages available. CSA certification for Canada.

Standard pumps furnished with inlet and outlet flanges, Q-max and Q-min flow control orifices for motor protection, differential pressurestat to monitor flow. CNF Series supplied with integral motor winding temperature sensors. Hansen pumps standard with Pump Guardian. Voltage: 440/3/60 is standard; 220/3/60 are available. For 50Hz applications, contact factory. Q-min (vent/bypass line) flange connection sizes: CAM 1, ½"; CNF32, CNF40, 1"; CNF50, 1¼". Standard flanges weld neck; special ODS connections available for CAM series; contact factory for pricing. Pump repair and rebuilding services available; contact factory.

Pump with Pump Guardian

**To Order:** Specify refrigerant, required pumping head, PSID, GPM, temperature, available NPSH, voltage and cycles. For pump pricing, contact factory.  $CO_2$  service available. Nominal Ratings performance capacities are based on 60Hz.

Note: Use Technical Equipment Discount Schedule.

#### **PUMP GUARDIAN PUMP CONTROLLER**

Designed to safeguard refrigerant liquid pumps. Alerts operators of harmful operating conditions. Prevents excess-recycling and unnecessary damage. Provides protection against cavitation, low liquid level, insufficient or loss of pump pressure, and motor-overtemperature. Nonvolatile electronic memory. For use with Hansen Hermetic refrigerant pumps; requires a Pressure-Stat to monitor pressure, **Part No. 61-0418**, see Parts List Pricing.

#### **TERMS & CONDITIONS AND LIMITED WARRANTY**

All quotations, products and services provided by Hansen Technologies, Inc. ("Seller") or its representatives to any customer, distributor, original equipment manufacturer, end-user or other purchaser ("Buyer") are furnished only on the terms and conditions stated herein. By ordering and accepting delivery of products and/ or services from Seller, Buyer agrees to and accepts these terms and conditions and agrees that, unless modified by separate negotiated agreement as provided below, these terms and conditions, together with the item, quantity, price, and similar terms as set out in Seller's quotation, order acknowledgement and/or invoice, constitute the entire agreement of the parties, superseding all other communications and documentation. Seller hereby expressly rejects any different or additional terms, preprinted or otherwise, contained or referenced in any purchase order or other documentation furnished by Buyer, whether before or receipt thereof is acknowledged by signature or otherwise. No modification of these terms shall be effective unless set out in arate negotiated agreement signed by an authorized officer of Seller.

QUOTATIONS & PRICES. Quotations are valid only for the period stated therein, and may be changed or withdrawn at any time prior to acceptance without notice. Quotations to non-U.S. Buyers are solicitations or inquiries for offers to purchase. Clerical or typographical errors are subject to correction. Quoted prices and delivery dates are valid only for the quantities, terms and payment schedule specified. Prices do not include, and Buyer is responsible for payment of, any applicable sales, use, value added, goods and services, excise, property, customs, stamp, documentary, import/export, or other taxes, tariffs, fees, duties, withholdings or like charges, whether domestic or foreign, related to the products and/or services supplied hereunder. Any such amounts paid by Seller will be invoiced to and paid by Buyer unless Buyer provides an exemption certificate acceptable to the applicable government authority:

**ORDERS & ACCEPTANCE:** Orders must be presented in writing or via electronic means acceptable to Seller and will be binding upon Seller only when accepted by written or electronic acknowledgment. Seller reserves the right, at its option and without liability, to refuse any order, in whole or in part, or to specify an alternate delivery schedule if orders from all sources exceed Seller's inventory or ability to de-liver. For special construction orders, Seller will provide an order acknowledgment outlining acceptance of the order and defining any necessary clarifications **b k** rms and conditions, deliverables, pricing, and project schedule. Where orders are placed, acknowledged, and/or invoiced by electronic transmission, the data transmitted will be deemed "in writing" and "signed," and any printout of electronic transmissions maintained in the ordinary course of business will be considered an "original" and admissible as between the parties to the same extent and under the same conditions as other business records maintained in documentary form. Seller shall be entitled to assume that persons placing orders on behalf of Buyer (electronically or otherwise) are authorized to do so and to accept the terms and conditions herein.

CHANGE AND CANCELLATION: Changes requested by Buyer after order acceptance must be submitted in writing and are subject to written acceptance by an autho-rized representative of Seller. Cancelled orders are subject to a minimum charge of 30% of value. Costs and/or delays resulting from such changes will be solely determined by Seller and binding on Buyer. Provided that Seller receives adequate written notice from Buyer, Buyer may cancel or suspend performance of any order for Seller-standard products for convenience, subject to payment of all reasonable charges as solely determined by Seller, which may include, without limitation, special tooling, work in process, handling and storage costs, costs associated with changes in design or specifications, and incidental and consequential damages. Orders for special con-struction products, special order pumps and custom length probes are non-refund-able and cannot be cancelled once in production. Seller's performance is subject to approval of Buyer's credit and Seller, with reasonable cause, may cancel or suspend per-formance of any order placed by Buyer if Buyer fails to meet any of its obligations herein.

PAYMENT TERMS: Unless otherwise specified in Seller's quotation or order acknowl-edgement, payment terms for U.S. Buyers are net 30 days from date of invoice, subject to approved credit at the time of order invoicing. Orders from outside the U.S. or Euro Zone require advance remittance by wire transfer; alternate international payment terms are considered upon request. Deposits or down payments, if any, are non-re-fundable; no discount for early payment is authorized without Seller's written consent. Partial shipments are billed as made and payable on the terms above. Payment terms will not be affected by any delay in delivery, installation or acceptance. Products will remain personal property, even if installed or affixed to any realty or structure. Seller reserves the right to modify payment terms or require prior payment, letter of credit, or COD when, in the opinion of Seller, Buyer's financial condition or previous pay-ment record so warrants. If Buyer becomes delinquent in any payment due, Seller in its discretion may take any and all actions permitted by law, including set off, and may in-stitute credit hold procedures on all open orders. Future orders will not be confirmed until Buyer's account is brought current, including any outstanding interest charges. A service charge (not to exceed 1.5% per month) may be charged on all past due balances. If Seller deems it necessary to refer an account to an agent or attorney for collection, all costs and expenses of collection (including, without limitation, reasonable attorneys' fees) will be charged to Buyer's account, up to the maximum amount allowed by law

**DELIVERY& INSPECTION:** All sales are Ex-Works Factory (Incoterms 2010). Title will pass upon issuance of the carrier's bill of lading at Seller's dock (subject to Seller's rights as an unpaid creditor) and, if not previously accepted, receipt of

delivery by or on behalf of Buyer will constitute acceptance of these terms and conditions. Buy-er will bear all risk and expense for delivery of goods, including without limitation, shipping, loading, unloading, storage, freight, and insurance. Any shipping contracts made by Seller will be for Buyer's account and, if paid by Seller, will be invoiced to Buyer in addition to the product price. Seller will endeavor to deliver accepted or-ders promptly; it is understood, however, that dates indicated for delivery or perfor-mance represent Seller's best current estimates only and Seller will have no liability for failure to perform within such dates. Products will be packaged for shipment in accordance with Seller's standard commercial practice; however, Seller will not be re-sponsible for loss or damage in transit. Buyer must inspect all items upon arrival and provide written notice to Seller, within 5 business days, of any claim for shortage or other nonconformance. If Buyer fails to give timely notice, all products will be deemed accepted. Use or resale of products in any manner following delivery (regardless of whether installation has occurred) will also constitute acceptance by Buyer. Any claim for loss or damage in transit should be made directly to the delivering carrier.

RETURN POLICY: Except in the case of valid warranty claims, no returns will be accepted after 6 months or without a Return Material Authorization (RMA) number from Seller. Products returned without an RMA number may be returned to Buyer freight collect. To ensure accurate and prompt processing of returns, the RMA number should be referenced on all shipping documents and correspondence. Returned products must be in the same condition as when they were shipped by Seller, and in their original packaging. Returned products must be sent by Buyer freight prepaid and properly boxed to prevent damage in transit. SELLER WILL NOT ACCEPT ANY C.O.D. PARCELS. Seller will inspect returned products upon receipt and issue any applicable credits based on the condition of the products and the terms of this policy. For stock items returned, a minimum restocking fee of 30% of the invoice price may be charged. For pressure relief valves (if returned within 60 days from date of shipment from the factory), a 30% restocking fee applies. Pressure relief valves more than 60 days from date of shipment, valves with non-standard pressure settings, special construction products, special order pumps, custom length probes, and end-of-life/last buy orders are non-returnable. After 6 months, all sales are final.

#### LIMITED WARRANTY:

<u>Product Warranty</u>. Products manufactured by Seller are warranted against defects in materials and workmanship under normal use in a typical operating environment (a) in the case of products other than electric motors and electronic items, for a period of one year from date of shipment from the factory, and (b) in the case of electric motors and electronic items, for a period of ninety (90) days from date of shipment except for where certain Legal Limitations may apply. This warranty extends only to the original Buyer, and shall be in force only upon payment in full for the product(s) to be warranted. Such warranty shall be effective only when products are properly installed, maintained, and serviced in accordance with good commercial practice and in compliance with all local codes and legal requirements, and used and operated in accordance with Seller's catalogs or bulletins for normal refrigeration applications, unless otherwise approved in writing. Products or components not manufactured by Seller are warranted only by the original manufacturer and only if and to the extent set forth in the original manufacturer's warranty, and Seller will have no warranty liability with respect to such third party products or failure of any such supplier to perform under its warranty.

Limited Remedy. Products returned to Seller during the applicable warranty period and found to be defective by factory inspection will be repaired or replaced with a conforming replacement product at Seller's option and without charge. The repaired or replaced product is then warranted for the remaining term of the applicable warranty or 90 days, whichever is longer. Warranty labor repairs may be performed at Seller's designated facility, with Buyer responsible for shipping (FCA Factory) or, at Seller's option, may be performed at Buyer's location, in which case any travel expenses (not to exceed the purchase price of the damaged part) will be borne by Seller, so long as Seller confirms that the defect is covered by warranty and not subject to any Exclusions below. Replaced parts shall become the property of Seller. If repair or replacement is not, in Seller's opinion, commercially feasible, or if Seller refuses or is unable to successfully perform such repair or replacement, Seller will refund an equitable portion of the purchase price paid by Buyer for the product. Seller will not be responsible for any other costs or charges, including without limitationcosts of dismantling, disassembly, de-installation, removal, or reinstallation. Service

required beyond the normal scope of warranty (see Exclusions below) or after expiration of the warranty period are billable repairs. Seller will charge Buyer its then-current prices for parts, labor, and transportation. Receipt and acceptance of a purchase order may be required before commencement of billable repairs. Buyer may also be billed for costs of testing and inspection of returned products with no trouble found Exclusions. Any warranty claim, support claim, or liability is excluded, and Buyer will be solely responsible, for any claim, damage, or liability arising out of (1) improper or faulty installation or failure to provide a suitable installation environment, (2) accident, misuse, abuse, extraordinary wear and tear, or neglect, (3) misapplication, improper use, or failure to follow Seller's operating instructions, safety precautions and bulletins, including lack of routine care or maintenance, use of non-approved refrigerants, or use of products outside of normal or specified o perating or environmental conditions, (4) damage, defects, problems, malfunctions, or failures created by any non-Seller products, accessories, software, attachments, or services or their interface with Seller's products, (5) acts of God, electrical power surges, or other causes external to the products, (6) alteration, disassembly, or repair in the field, or (7) any failure to grant Seller the required time and opportunity to carry out any necessary repairs. Products disabled by dirt, debris, or other foreign substances will not be considered defective. Where critical temperature or products are involved, backup temperature controls and alarms are required. It is the responsibility of the installer to add devices (alarms, safety and limit controls, etc.) that protect against or warn of any operating control failure. Users and operators also must be aware that harmful refrigerant properties and pressure could damage products or injure people. Seller's responsibility will in all events be limited to repair or replacement of the failed or defective Seller product(s), and will not include any further liability for or arising out of any third party products with which Seller's products may be installed, combined, or used. TO THE FULL EXTENT ALLOWED BY LAW, THE FOREGOING LIMITED WARRANTY AND REMEDIES ARE EXCLUSIVE AND EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES, REPRESENTATIONS, OBLIGATIONS, OR LI-ABILITIES, WHETHER WRITTEN OR ORAL, EXPRESS ORIMPLIED, STATU-TORY OR OTHERWISE, INCLUDING BUT NOT LIMITED TO WARRANTIES, TERMS, OR CONDITIONS OF MERCHANTABILITY, FITNESS FOR A PAR-TICULAR PURPOSE, CORRESPONDENCE WITH DESCRIPTION, AND NON-INFRINGEMENT, ALL OF WHICH ARE HEREBY EXPRESSLY DISCLAIMED. Certain Legal Limitations. When, under applicable law, implied warranties are not allowed to be excluded in their entirety, such warranties will be limited to the duration of the applicable written warranty. For European customers, if any warranty period specified herein is less than the minimum warranty period required by law, the warranty period will be extended to the period required by law, and any terms herein limiting Seller's liability shall not apply insofar as they conflict with mandatory statutory provisions of the Product Liability Act. No employee, agent, dealer or other person is authorized to modify, vary, or extend Seller's warranties as set out herein or to assume for Seller any other liability in connection with its products. Service & Support. To obtain warranty service or technical assistance contact Seller by phone (Toll Free: 800-426-7368), email: info@ hantech.com, or web: www.hantech.com/Warranty & Returned Goods. Concerns regarding service and support may be addressed by writing to Hansen Technologies Corporation, 681 Commerce Street, Burr Ridge, IL 60527, USA.

**PRODUCT SPECIFICATIONS AND VALIDATION:** All products, when delivered by Seller, will conform to Seller's specifications; however, Buyer is responsible for validation of each specific product application and any use of products as a component of or in conjunction with other products or attachments not supplied by Seller for such purpose, including all necessary testing and qualification, and will put in place all necessary systems and protections to ensure that any failure or defect relating to the products will not result in any other or further damage. Seller reserves the right to discontinue or change the design or specifications of any product or component at any time, and will use commercially reasonable efforts to notify Buyer of any decision to discontinue products or material changes in specifications affecting form, fit or function.

USE RESTRICTIONS & REQUIREMENTS: Buyer is responsible for compliance with all applicable laws, regulations, codes, recommendations, and requirements of government authorities and for obtaining all licenses and permits pertaining to the purchase, shipment, import, export, transfer, sale, disposition, installation, operation, and/or use of the products supplied hereunder, including any use or sale as a component of any non-Seller products, it being understood that Seller makes no warranty of any kind regarding compliance with such requirements. Buyer may not (1) modify, alter, disassemble, or make any changes to any products or items provided by Seller or permit any other party to do so without Seller's prior written consent; (2) import, export, sell, transfer, service, store, handle, distribute or use any product or item supplied hereunder in any manner prohibited by applicable laws and regulations, including all applicable export control laws, restrictions and regulations, or contrary to any written warning or instruction given by Seller herein, in the product documentation, on Seller's website, or otherwise; or (3) make any representations or warranties on behalf of Seller as to the quality, merchantability, fitness for a particular use, or other features of the products. Each party shall defend, indemnify and hold harmless the other from all liabilities, claims, losses, damages, and expenses (including without limitation reasonable attorneys' fees) arising out of any breach of these terms and conditions except as expressly limited herein.

PROPRIETARY INFORMATION: Buyer acknowledges that Seller's products are based upon and embody various confidential and/or proprietary technology, processes, methods, information, know-how, and trade secrets of Seller. Seller shall exclusively own all inventions, technology, know-how, trade secrets, and other proprietary information of any kind used or embodied in the products, documentation, drawings, specifications, software, and other items furnished by Seller, all intellectual property rights with respect thereto, and all reproductions or derivatives thereof in any form ("Proprietary Information"). Buyer shall neither acquire nor claim any right, title or interest in, and shall exercise reasonable care to maintain the confidentiality of, Seller's Proprietary Information, and shall use the same solely as required for its authorized use of Seller's products as supplied hereunder. Buyer may not directly or indirectly (1) copy, adapt, develop, disassemble, reverse engineer, recast, compile, decompile, translate, or create derivative works from any products or items provided by Seller, or permit any other person to do so, (2) remove alter, or obscure any copyright, trademark, patent, logo, government restricted rights, or other notices or legends from items provided by Seller, or (3) disclose or use Seller's Proprietary Information for commercial purposes or in a manner detrimental to Seller. Disclosures of Proprietary Information may be made only to Buyer's personnel having a specific need to know and a written obligation to protect such information no less restrictive than the restrictions herein, and Buyer will be responsible for any breach by its personnel. It is agreed that any breach of this Section may cause Seller irreparable harm for which recovery of damages would be inadequate, and that immediate injunctive or other equitable relief is appropriate and available to Seller to prevent any violation, threatened or actual, of this Section, in addition to any other remedies and without proof of actual damage.

LIMITATION OF LIABILITY: No claims, regardless of form, arising out of the products or transactions to which these terms apply may be brought by Buyer more than 2 years after the cause of action arises or performance hereunder is completed or terminated, whichever is earlier. SELLER'S AGGREGATE LIABILITY IN DAMAGES OR OTHERWISE FOR ANY AND ALL CAUSES WHATSOEVER (INCLUDING BUT NOT LIMITED TO ANY CLAIMS FOR INDEMNIFICATION) SHALL BE LIMIT-ED TO THE PURCHASE PRICE PAID OR PAYABLE TO SELLER FOR THE AP-PLICABLE PURCHASE ORDER. IN NO EVENT WILL SELLER BE LIABLE FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE, EXEMPLARY, OR OTHER INDIRECT LOSSES OR DAMAGES, HOWEVER CAUSED, WHETH-ER FORESEEABLE OR NOT, AND EVEN IF ADVISED OF THE POSSIBILITY THEREOF. THESE LIMITATIONS WILL APPLY REGARDLESS OF THE FORM OF ACTION, WHETHER CONTRACT, TORT, STRICT LIABILITY, INDEMNIFI-CATION, OR OTHERWISE, NOTWITHSTANDING THE FAILURE OF THE ES-SENTIAL PURPOSE OF ANY LIMITED REMEDY. FOR EUROPEAN CUSTOM-ERS, THE FOREGOING SHALL BE MODIFIED SOLELY AS REQUIRED UNDER THE PRODUCT LIABILITY ACT, IT BEING AGREED THAT CLAIMS OVER AND ABOVE THOSE UNDER THE PRODUCT LIABILITY ACT WILL NOT BE MADE BY BUYER AGAINST SELLER, AS MANUFACTURER, UNDER ANY THEORY OF LIABILITY, INCLUDING BY MEANS OF INDEMNIFICATION OBLIGATIONS. Buyer acknowledges that these limitations of liability are a material part of the bargain between the parties and are reflected in product pricing, which would be higher without these limitations.

FORCE MAJEURE: Neither party will be liable for non-performance or delay in performance of any obligation (other than payment of monetary sums due) to the extent caused by events or circumstances beyond its reasonable control and without negligence on its part, provided that the affected party uses reasonable efforts to avoid or remove any causes of nonperformance and continues performance with reasonable dispatch whenever such causes are removed. For delays resulting from such causes, performance will be correspondingly extended.

**GOVERNING LAW:** The place of performance is exclusively the head office of the company delivering. For all customers, these Terms and Conditions, all transactions to which they may apply, and any disputes arising out of products or services supplied hereunder, shall be governed by the laws of the State of Illinois and the United States of America, excluding any conflict of law provisions thereof, and the courts of the State of Illinois or of the United States located in DuPage County, Illinois will have exclusive jurisdiction for all claims. Buyer hereby submits to the jurisdiction of the foregoing courts, as applicable, for the purpose of any such action. The United Nations Convention on Contracts for The International Sale of Goods, the Uniform Law on the Formation of Contracts for the International Sale of Goods, and any international discovery and service of process conventions will be inapplicable.

HANSEN

#### **RMA RETURN MATERIALS & WARRANTY ITEM PROCEDURES**

- Go to www.hantech.com/rma
- Request an RMA number issued to return material
- Provide Original Purchase Order #
- An RMA number must be issued and clearly marked on outside of all boxes shipped back to Hansen Manufacturing (Commerce, GA)
- RMA shipments should be returned to:

Hansen Technologies Attn: RMA# \_\_\_\_\_ 3475 Old Maysville Road Commerce, GA 30529 USA

#### **RETURNED GOODS POLICY**

Products returned are normally subject to a minimum 30% restocking charge. Restocking charge is based on actual invoiced amount. To ensure accurate and prompt processing of your Return, reference your original purchase order number, invoice number and Return Material Authorization (RMA) number in all communications. Freight on all return shipments must be "PREPAID".

Special construction products, special order pumps and custom length probes are non-returnable and cannot be cancelled once in production.

Any claims by Buyer for omissions, shortages, or discrepancies in pricing shall be waived unless Seller receives notice thereof within 30 days after Buyer's receipt of the shipment.

The following restocking charges apply to new and unused items in original packaging and require no rework to restock.

Time from Invoice Date	<b>Restocking Percent</b>			
6 months or less*	30%			
Pressure Relief Valves (60 days or less)**	30%			

\* Higher restocking charges may be applied depending on product condition.

\*\* Pressure relief valves shipped more than 60 days from date code stamped on valve name plate or non-standard pressure settings are non-returnable.

#### **EMERGENCY HOT LINE (866.244.4829)**

A Service Fee of \$250 if parts shipment is required.

#### EXPEDITE FEE

A \$50.00 processing and handling fee will be applied to all expedited orders scheduled for same day ground shipment.

#### **EXPORT RESTRICTIONS**

Buyer shall not export or re-export goods in violation of any applicable laws or regulations of the United States or the country in which Buyer obtained them.

#### MINIMUM BILLING AND PRICING POLICY

VISA, MASTERCARD, AMEX are accepted. Non-standard product order \$300 List Extra. For products requiring CE Mark, please specify when ordering and Add Extra 10% per item. An expedite fee may apply for same day shipping. Material Test Reports (MTR) \$100.00 per line item.

Prices are subject to change without notice.

#### **TECHNICAL BULLETIN UPDATES AND CERTIFICATIONS**

Hansen Technologies Corporation strives to offer products which meet and exceed current regulations worldwide. Please visit HANSEN online at **www.hantech.com** for up-to-date product technical bulletins, certifications regarding CE Mark for PED, ,CRN Registrations, other Statements of Compliance and Safety Precautions.

**APPROVED REFRIGERANTS:** The following list of refrigerants are approved by Seller and are compatible with our standard gasket material.

R-22 R-134a R-404a R-410 R-507a R-717 R-744 CO2

ANY REFRIGERANT NOT LISTED REQUIRES WRITTEN APPROVAL BY SELLER.

3475 Old Maysville Road Commerce, Georgia 30529 USA

#### Toll: 800.426.7368 Tel: 630.325.1565 Fax: 630.325.1572 Email: sales@hantech.com Web: www.hantech.com

This is a summary of safety procedures for the proper selection, installation, use and maintenance of Hansen refrigeration valves or other products hereafter all called components. Hansen components are only for refrigeration systems using ammonia, R22, R134a and other Hansen-approved refrigerants (by the factory in writing). This summary is intended to help you protect your personnel, product, and plant. However, this information must be supplemented by accepted and known industry safety practices and local code requirements.

Hansen valves and other components are designed and built to the highest standards of the refrigeration industry. Refrigerant in the system must be kept free of any foreign matter such as dirt, grit, rust, impure oil, wax, sludge, water, etc. However, for proper performance, components must be correctly chosen, properly installed, and periodically serviced.

All personnel working on valves or refrigeration components must be qualified to work on refrigeration systems. Any person intending to service a valve or component should completely read this summary and the bulletin describing the particular component and its operation before any work begins. Do not remove any part unless the interior pressure of the component is below zero. When installing or servicing valves or components, bonnets and bolts must be properly torqued. If there are any questions, contact Hansen before proceeding with the work.

Abnormal sounds and/or vibrations of piping, fans, pumps, pressure actuated pumping systems and hydraulic pipe pressure surges should be corrected.

If a component has failed under circumstances which caused, or could have caused, injury to personnel or damage to property, a replacement should not be installed until the reason for the previous failure is determined and corrected.

Where critical temperatures or products are involved, backup temperature controls and alarms are required. It is the responsibility of the installer to add devices (alarms, safety and limit controls, etc.) that protect against or warn of any operating control failure. Users and operators also must be aware that harmful refrigerant properties and pressure could damage products or injure people.

As with all electronic and mechanical components, there is a limited life expectancy. An expected maximum life of seven to ten years is typical for an electronic component. This should be understood as only a suggested replacement time period. Actual condition and performance of electronics due to ambient conditions, quality of electrical current, voltage, etc. may necessitate a different replacement schedule. Regardless, all mechanical, electrical, and electronic components should be inspected at least annually and replaced or repaired as necessary to ensure their safe and continuous service. Parts subject to wear should be replaced by factory-original components. Valves exhibiting excessive rust must be maintained, repaired or replaced as necessary.

#### LIQUID EXPANSION

Temperature increase in a section with trapped 100% liquid can cause extremely high pressures due to the expanding liquid and possibly rupture a gasket, pipe, or various components. When low temperature liquid lines are used, as in a liquid overfeed (recirculation) system, and the lines, valves or other components may be exposed to warm ambient conditions, particular care must be taken. Liquid expansion can occur very rapidly, even if warmed only slightly, with subsequent rupture pressure if not relieved or vented properly.

#### **RELIEF DEVICES**

Relief devices must be inspected semiannually for rust, corrosion, and other factors which may prevent valves from operating properly, and should be replaced at intervals of no longer than five years. In addition to normal pressure vessel relief requirements, atmosphere relief devices or relief methods must be used in all parts of a refrigeration system where liquid can be trapped and liquid expansion could take place. Do not use "gas service only" relief devices for liquid relief applications.

#### **VELOCITY SHOCK**

Systems must be designed and operated to avoid any velocity shock of liquid being conveyed to valves or components or other equipment. Screw compressor side port feed is very severe duty in this regard and design precautions are necessary. Delayed valve openings or closings or other methods must be utilized where shock is a potential problem.

#### PROBES

When removing housing (electronics) for service, do not rotate or back-out the probe itself from the pressurized level column. When removing oil from level column, follow standard pump out procedure.

#### SHUT-OFF VALVES

All valves that could trap liquid when closed must be marked with a warning against accidental closing. Some liquid refrigerant must be removed to be replaced by gas before the shut-off valves are closed on both sides of a control valve or any other component. Also, liquid must be removed before a shut-off valve is closed at the inlet of a solenoid valve or a regulator with a positive electric shut-off, or some outlet pressure regulators, or at the outlet of a check valve, unless these control valves are manually open. To protect personnel, product, and plant, remove the liquid from the section to be isolated before shut-off valves are closed. Make sure the control valve seat ports are open when removing the liquid. Shut-off valves leading to the atmosphere, even if it is temporary, must be plugged or capped to prevent corrosion inside of the valve, as well as leakage due to seat expansion, vibration, dirt, or improper opening; the valve seat should be left cracked open to prevent hydrostatic expansion between the valve and the plug or cap. One must take care when operating valves or regulators with threaded bonnets so that the bonnet does not turn. Bonnets must be torqued to factory specifications after field-servicing. Shut-off valves should be either wide open or closed shut in service. Shut-off valve should not be used as a throttling valve. Use hand expansion valves for throttling gas and liquid.

#### INSTALLATION

Installation must be done according to all applicable Safety Codes and Standards, and by personnel qualified to install refrigeration systems. Every segment of a refrigeration system, including control valves, must be field pressure tested before system is insulated and put into use. Make sure that correct high and low side pressures are used. Pressure or temperature must never exceed the limits stated in current bulletins. For most up-to-date product bulletins, go to http://www.hantech.com.

Allow proper space for installing any valves. Do not use a valve or component to "stretch" or "align" the pipe. Using flange bolts to close a large gap can distort a valve or at least stress it unduly and possibly cause it to malfunction, or the bolts may be damaged or stripped. For proper sealing, gaskets should be lightly oiled and all bolts must be tightened evenly. Make sure the flange tongues are properly aligned with the grooves in the valve or component body. Where necessary, support components by brackets or hangers to avoid overstressing.

Components must not be installed in locations where they can be damaged by material handling or other equipment. Trapped ice buildup must be avoided at or between valves and other equipment. Provide reasonable access to all components for maintenance purposes. Individual valves, control stations, pumps or other components must be provided with isolation valves and means for pumping out or safely purging the refrigerant.

#### **PUMP OUT**

For the protection of personnel, product, and plant, all refrigerant must be removed from a valve or any other component of the system before any refrigerant retaining part is loosened. Before opening a valve, make sure all refrigerant has been removed. In particular, beware of strainers and other sections of valves or piping which may trap liquid refrigerant which will require a considerable length of time to remove. Pump out as much refrigerant as possible before discharging remaining refrigerant in a properly protected manner. During pump out, it is normally advisable that control valves be opened manually whenever possible to avoid trapping refrigerant.

At times, it may be necessary to discharge some small amount of refrigerant from the isolated section. When this becomes necessary, certain precautions must be observed. Make sure control of discharge rate can be easily maintained and that a quick shut-off is available. Whenever possible, refrigerant should be discharged into and disposed of in a proper container accepted by applicable safety codes and other standards including environmental. Discharge of refrigerant to atmosphere must be avoided. Never discharge any refrigerant into an area without sufficient ventilation, or into an area where open flame or electrical spark is present. Any oil in the refrigerant may cause a mist that could cause a fire or explosion. To prevent pulling excessive air and moisture into a system, avoid opening the system when it is under noticeable vacuum.

#### CAUTION

Do not attempt to work on any part of a refrigeration system without help nearby and observing. Disconnect all electric power to components involved. Use "lock-out/tag-out" for electrical and fluid security. Use safety goggles or safety face mask to protect the eyes. Other parts of the body, especially the face, hands, and lungs must also be protected. Protective equipment including breathing apparatus and eye flushing equipment must be readily available, and all personnel involved must be thoroughly trained in its use. Personnel must be especially protected against falling because they may be startled by escaping refrigerant. Always make sure that there is a way out and that everyone can leave the area fast. When seal caps cover manual opening or adjusting stems, the cap must be removed with caution - liquid refrigerant could accumulate under cap. Avoid all possibility of contact with any refrigerant liquid or gas.
